

for Life

Unleashing Life

with attractive, clever packaging ideas

 bormioli pharma

Summary

Intro

Products

Outro

We make health
a positive practice,
accessible to everyone,
kind to the planet

We are Healthcare Solutions Providers

We serve the global healthcare industry in its many forms. We view our products not only as primary packaging, but as well-rounded solutions designed to exceed customer needs and foster a sustainable future for our planet.

Innovation and sustainability drive our actions. The following traits drive our identity:

Expertise

Almost 200 years of experience, more than 1400 professionals continually trained on pharmaceutical standards, and an ever-expanding manufacturing footprint make us the “packaging-savvy” choice for the pharma industry.

Quality

From employee practices to highly-automated and controlled productive processes, quality is diffused throughout the entire organization and testified by our various international certifications.

Flexibility

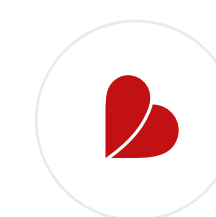

Starting from a «customer first» approach, we strive to ensure product availability, supply chain flexibility and continuous innovation. We believe that a co-partnership model is crucial to adding value to our clients’ projects.

Bormioli Pharma Invents.

We turn patient insights into effective health solutions

Bormioli Pharma Invents is our Open Innovation program based on the collaboration between Universities, Start-ups, Research Centers and our internal R&D. The program relies on ethnographic research and direct interviews with patients and health professionals to determine real needs.

Created to discover and develop meaningful healthcare solutions, the program focuses on two main areas that address some of the most crucial industry trends:

Health Positive Area
inventing for Usability, Connectivity,
Traceability

Eco Positive Area
inventing for Sustainability

Our Invents Concepts. Positive for the future of health

Every year we undertake a new innovation cycle, which turns deep and fact-based insights from industry players, patients and health professional into creative ideas. Then, thanks to a «fast factory» approach, we quickly convert these ideas into prototypes .

**This is what we've come up with so far.
Let's invent together to create even more.**

Check out our
Invents programs
on our website

–
[Click here to discover more](#)

• Connectivity

We want to make our products increasingly safe and easy to use, meeting the evolving needs of every category of user: from patients, to people with disabilities, to professionals.

• Usability

We want to transform our products into smart systems that can connect to technology devices, provide information to patients, and help improve treatment adherence.

• Traceability

We want to make our products trackable devices, and put them at the center of more extensive integrated track-and-trace systems.

• Sustainability

We want to make our products increasingly sustainable by identifying alternative materials and designs, and production processes with a lower environmental impact.

Our EcoPositive Products. Positive for the future of our planet

EcoPositive is the name we came up with to describe all of the solutions that care about the environment.

With more than 15-years' research in planet-friendly packaging, we can now offer a comprehensive range of sustainable glass and plastic solutions, grouped into 3 main categories:

Regenerate

glass and plastic packaging recycled from first-choice waste collection

Renew

bioplastic packaging derived from renewable sources

Reloop

glass and advanced polymer products made from infinitely reusable materials

Choose your EcoPositive way, and let your patients make a sustainable choice.

One Strategy, three Portfolios

We are a single brand with a strong conviction:
to best serve our customers and those who trust them.

That's why we segmented our range into three Portfolios,
offering focused healthcare solutions, depending on specific
industry, professional and patient needs.

for Therapy

Complete packaging solutions designed to exceed
the requirements of high added-value drugs
and therapeutic medicines.

for Health

Highly functional healthcare solutions, developed
to meet people's needs for safe and reliable
OTC packaging.

for Life

Distinctive and creative packaging solutions,
crafted to bring well-being products to people's
lives.

for Life

Well-being products help customers to live their lives to the fullest. Similarly, packaging should allow products to best express their potential.

Our Life Portfolio is envisaged to unleash the positive power of the products inside of our packaging, whilst presenting them in the most appealing and distinctive way possible.

Unleashing the power of well-being products, with attractive and clever packaging solutions.

Oral

Vast configuration, color and shape options

to make your product eye-catching and user-friendly

Advanced barrier technologies

to protect and preserve the natural power of your products

Dual chamber systems

Enhanced with cutting-edge
barrier options

to extend product shelf-life

Consolidated “go-to-market” platform

to support customers in creating an effective supplier network

50 years of relentless range evolution

to keep the pace with ever-changing market needs

Dual chamber systems

+ PowerRec

+ EasyRec

+ AccuRec

PowerRec

The powerful gesture to activate energy blends

PowerRec is a single-dose packaging for instant and right-dosed energy recharge.

Its fully manual activation enhances the powerful properties of the mixture.

Key advantages:

+ To keep the properties of your product unchanged

+ In-sight mechanism

+ Pocket size

Administration

PowerRec allows to get a ready-to-drink product in a few simple steps.

EasyRec

The intuitive way to mix active ingredients

EasyRec is a single-dose system that preserves the freshness and integrity of active ingredients.

Thanks to its internal mechanism it ensures a simple and intuitive activation.

Key advantages:

- + One shot solution
- + Interactive and effective
- + Tamper evident closure

Administration

EasyRec facilitates product reconstitution thanks to its user-friendly mechanism.

AccuRec

The evolution of drug reconstitution

AccuRec is high-tech solution that offers precise reconstitution for oral products.

Its mechanism guarantees safety during administration.

Key advantages:

- + To keep the properties of your product unchanged
- + Perfect dosing and reconstitution
- + Mistake - proof system
- + Safety features

Administration

AccuRec provides a unique functional experience in taking drugs and food supplements.

Consumers are increasingly demanding sustainable packaging. To support you in meeting this demand, we offer:

+ Containers and accessories
made out of bio-based materials

+ Fully-recycled bottles and caps

+ Nature-friendly colorants
and additives
